Samson Odo

Founder & Chief Technology Officer at NodeShift Nigeria  
Abuja, Federal Capital Territory, Nigeria

Summary

I'm driven by one core belief: technology should be both visionary and useful.

At NodeShift Nigeria, I lead the development of AI-native infrastructure, designing modular, adaptive ecosystems that power the next generation of intelligent systems and rethink how industries operate.

My expertise spans AI, machine learning, blockchain, digital media, cloud architecture, cybersecurity, and product strategy. What truly sets me apart is my ability to integrate these diverse domains to build scalable, resilient systems.

I intentionally broaden my knowledge across diverse fields, seamlessly connecting technology, business, and leadership to turn innovative concepts into practical solutions.

Always open to connecting with investors, technologists, and builders who are using emerging tech to challenge norms and engineer real transformation.

Experience

NodeShift Nigeria  
Chief Technology Officer  
March 2024 - Present (1 year 4 months)  
Abuja, Federal Capital Territory, Nigeria

- Directing product information management, designing systems to ensure seamless data integration and accessibility across platforms, enhancing operational efficiency.
- Spearheading technology architecture, developing scalable and innovative infrastructure to support NodeShift Nigeria's cutting-edge IT solutions.

- Providing leadership, guiding cross-functional teams to align technical development with strategic business goals, fostering a culture of innovation and collaboration.
- Advancing automated machine learning (AutoML) initiatives, implementing intelligent systems to optimize processes and drive data-driven decision-making.
- Overseeing technical product development, leading the creation and launch of market-ready IT products, ensuring alignment with customer needs and industry standards.

Key Skills Developed: Product Information Management, Technology Architecture, Leadership, Automated Machine Learning (AutoML), Agentic AI, Technical Product Development.

## Etheon Collective

Board Member

May 2025 - Present (2 months)

Abuja, Federal Capital Territory, Nigeria

## Scilla Field Solutions

Project Manager

March 2021 - January 2024 (2 years 11 months)

Abuja, Federal Capital Territory, Nigeria

- Led project planning efforts, developing detailed timelines, budgets, and resource allocations to ensure successful delivery of IT initiatives aligned with business objectives.
- Utilized data-driven decision making to analyze project metrics, optimize strategies, and drive measurable improvements in performance and outcomes.
- Managed product information management systems, ensuring accurate data integration and streamlined workflows across cross-functional teams.
- Implemented process optimization initiatives, reducing inefficiencies and enhancing operational delivery by refining project workflows and resource utilization.
- Conducted compliance monitoring to uphold industry standards and regulatory requirements, maintaining project integrity and stakeholder trust.

Key Skills Developed: Cross-functional Team Leadership, Strategic Business Development, Process Optimization, Compliance Monitoring.

Notable Achievements:

- Improved data processing efficiency, enhancing client service capabilities.
- Spearheaded multiple strategic business development initiatives, significantly increasing client satisfaction through optimized service delivery.
- Reduced project delivery timelines through effective process improvements, maintaining high-quality standards.
